Subject: Microsoft case

Dear Dept. of Justice: I am most concerned about your decision to settle your pending suit with Microsoft. I strongly believe it will not resolve the problem and may actually create additional problems down the road. With the Enron debacle hanging over our collective heads, this quick fix appears to be another possible blunder on government's part. Do take some time to really think this thing through and get some input from different sectors of the economy. Quite simply put, I am saying no to the Microsoft settlement.
